Benny Joel Lakamana

Visual Designer • 3D Technical Artist • Motion Systems

Work across feature film on-set VFX coordination, Unreal Engine trailer-to-game sequences, 3D previs development, high-conversion product interfaces, and code-driven motion systems. Based in Hyderabad, India.

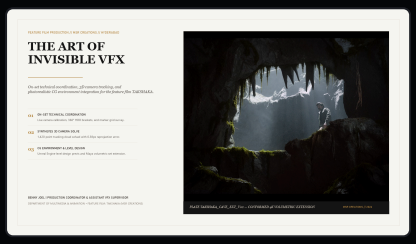
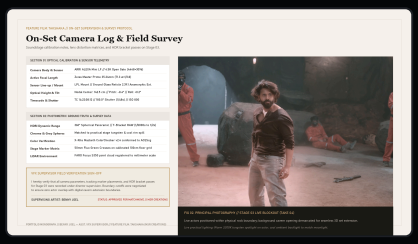
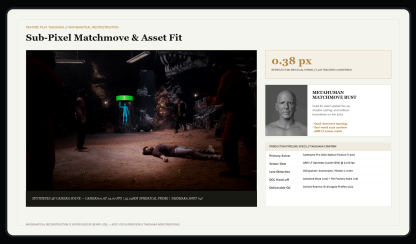
01 / TECHNICAL PRESENTATIONS

Pitch Decks & Production Specifications

Technical presentation decks authored for theatrical feature film VFX supervisor defense and 3D previsualization sequences.







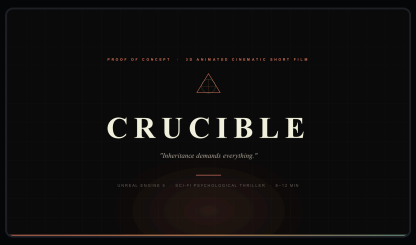
THEATRICAL VFX · ON-SET DATA METRICS

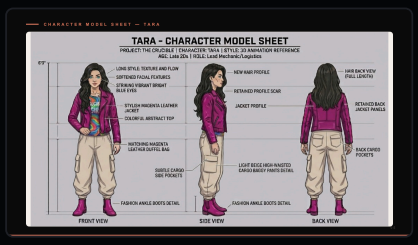
Takshaka: Technical Defense Deck

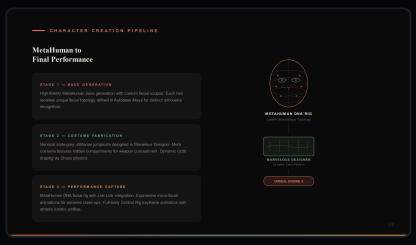
On-set camera data logging, 3D Syntheyes camera recovery, Unreal Engine 5 virtual set extensions, and high-fidelity plate reconstruction across 140+ feature film VFX shots.

1920x1080 MASTER PDF

View Full PDF ↗







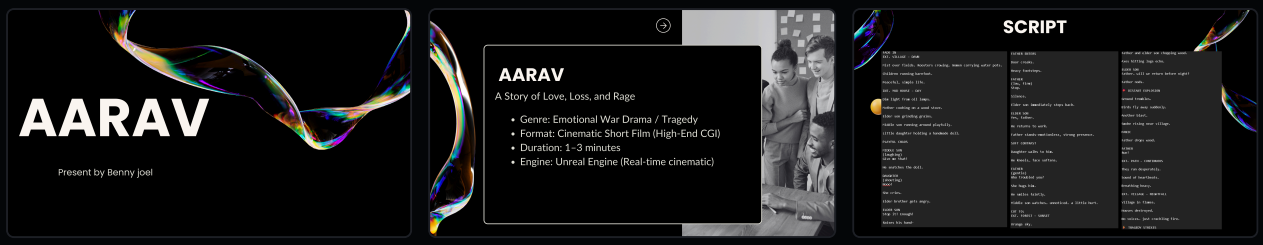
3D PREVIS SEQUENCE · TRAILER-TO-GAME / PREVIS

Crucible: 3D Previs Sequence Deck

Previsualization sequence for 3D cinematic production. Details character silhouettes, spatial lighting setups, camera blocking, and narrative visual staging.

1920x1080 MASTER PDF

View Full PDF ↗



3D PREVIS SEQUENCE | TRAILER-TO-GAME / PREVIS

Aarav: 3D Previs Sequence Deck

Previsualization sequence for 3D cinematic production. Covers emotional narrative progression, dramatic key lighting, camera movement, and thematic visual development.

1920x1080 MASTER PDF

02 / INTERFACE & SYSTEMS

Dominator Systems: Product UI & Storefront Architecture

Production digital product interfaces, responsive mobile viewports, and enterprise dashboard architecture engineered with strict 8px grid balance, WCAG AAA accessibility, and dark luxury finish.

Dominator Systems Production Storefront

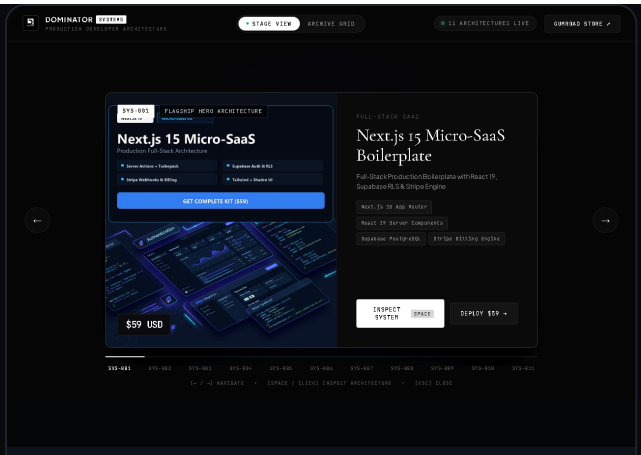
Launch Live Website ↗



E-COMMERCE ARCHITECTURE

DESKTOP UI (1280x800)

Dominator: Desktop Storefront

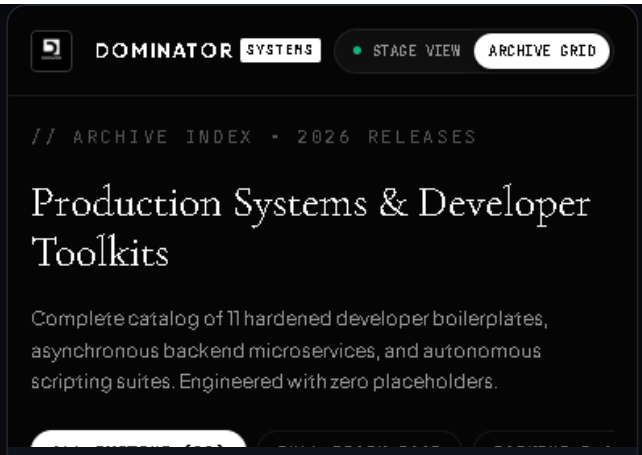
Full desktop storefront interface engineered for dark luxury visual appeal, high data density, and clear conversion paths. Implements strict typography scales, tactile button elevations, and frictionless checkout flows.

8px Layout Grid

WCAG AAA Contrast

Conversion UX

Dark Luxury Theme



MOBILE EXPERIENCE

VIEWPORT (390x844)

Dominator: Mobile Responsive UX

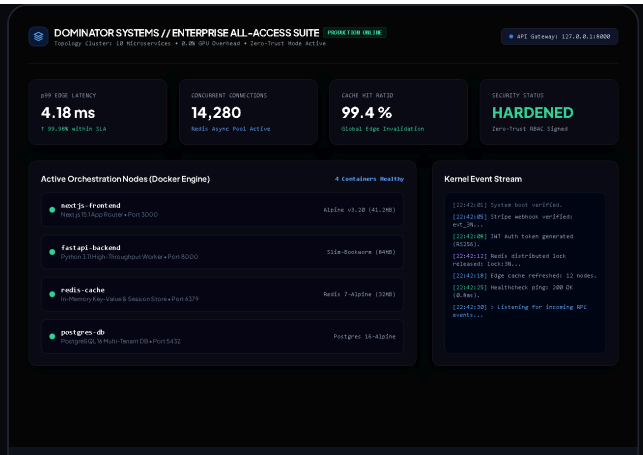
Mobile viewport adaptation centered on ergonomic thumb-zone reachability, sticky high-contrast CTA anchors, fluid type scaling, and minimum 48px touch targets to prevent accidental taps.

Thumb-Zone Mapping

Touch Targets ≥48px

Fluid Typography

Sticky CTA Anchor



ENTERPRISE DASHBOARD

ANALYTICS & ASSETS

Enterprise Operations & Ingest Dashboard

High-density enterprise control interface for tracking studio production throughput, real-time render node dispatch, and asset ingestion statuses with zero visual clutter.

High Data Density

Status Badging

Design Tokens

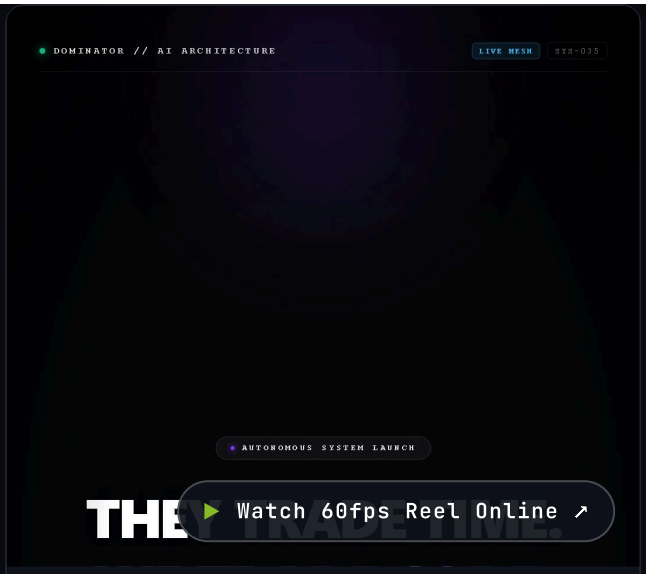
Studio Workstation

03 / KINETIC MOTION

Broadcast Motion Graphics & Kinetic Typography

Dynamic typography, dark luxury UI motion, and real-time audio-reactive rendering engineered programmatically at 1080×1920 60fps.

> **Production Pipeline & Tooling Disclosure**
>
> Engineered using **Google Antigravity** and **clean-room creative engines (EffectCraft)** alongside **Adobe After Effects**. Code-driven layout graphs eliminate manual keyframing and render broadcast-grade 1080×1920 60fps video at machine speed.

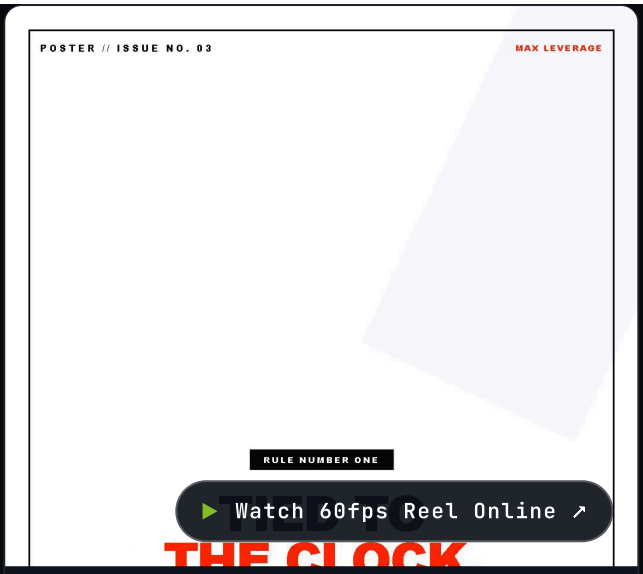


Apex Grand Motion System • Clean Broadcast Master

Apex Grand Motion System

High-contrast luxury dark UI motion with expanding radial rings, fluid typographic reveals, and clean neural voiceover mastering.

Pipeline: Antigravity Agentic Code • Headless EffectCraft Engine • 1080x1920 60fps



High-Velocity Typography • Spring Easing

Kinetic Typographic Identity System

Dynamic kinetic typography highlighting typographic scale, negative tracking, and spring momentum easing for broadcast distribution.

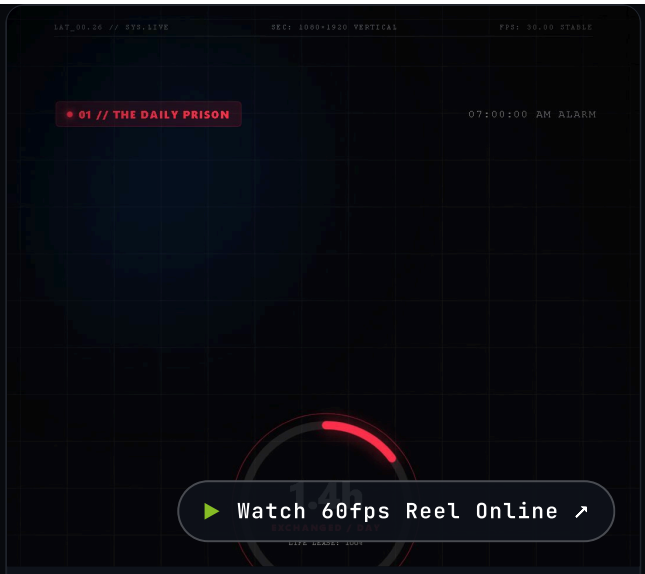
Pipeline: Reverse-Engineered EffectCraft Core • Spring Physics • 1080x1920 60fps

Telemetry HUD • Dynamic Data Streams

Titanium Metering & Telemetry HUD

Precision technical data visualization showcasing live counters, audio waveform reactive meters, and real-time status cards.

Pipeline: Procedural Math Shaders • Headless Clean-Room Render Engine



Swiss Grotesque • Editorial Layout

Swiss Monolith Editorial Motion

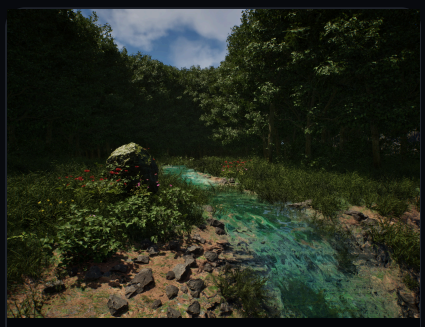
Editorial motion graphics implementing Swiss Style principles: strict grid alignment, high-contrast geometry, and fluid wipe transitions.

Pipeline: Antigravity Code Orchestrator • Adobe After Effects Comp Graph

04 / REAL-TIME 3D & TRACKING

3D Environments & Camera Tracking

Trailer-to-game environments, virtual background plates, and theatrical camera tracking authored in Unreal Engine 5, Autodesk Maya, and Syntheyes. High-resolution captures from project archives.



Unreal Engine 5 • Instagram Featured (@primitive)

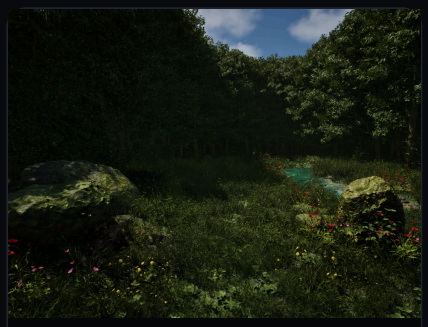
Mountain River Gorge & Water Shaders

Real-time translucent water shading, dynamic riverbed moss displacement, and procedural foliage scattering authored in Unreal Engine 5. Rendered at 6.6K master fidelity.

Unreal Engine 5 • Daylight Illumination

Grand Temple Colonnade

Monumental architectural environment built with Nanite geometry, real-time sun illumination, and calibrated camera focal depth.



Atmospheric Volumetrics • Shading

Subterranean Cathedral Vault

Cathedral-scale interior environment testing dramatic upward focal perspectives, roughness variation, and high-dynamic-range illumination.

Unreal Engine • Trailer-to-Game

Worldbreaker: Trailer-to-Game Environment

Expansive trailer-to-game level built in Unreal Engine for Worldbreaker, engineered for seamless camera traversal and multi-layered atmospheric lighting.

Matchmoving & Spatial Survey

Syntheyes 3D Camera Matchmove

Solving real-world optical distortion, sensor dimensions, and nodal camera rotations from theatrical rushes with sub-pixel precision (<0.5px).

Feature Film VFX • 140+ Shots

Theatrical Plate Prep & Wire Removal

On-set Macbeth chart extraction, dynamic rig/wire extraction, and high-fidelity clean plate reconstruction for VFX compositor handoff.

05 / BACKGROUND & QUALIFICATIONS

Production Records & Credentials

Studio production deliveries across feature film VFX pipelines, real-time 3D previs, and scalable design system engineering.

FEATURE FILM • LEAD VFX COORDINATOR

Takshaka: On-Set VFX & Theatrical Coordination

Directed on-set data acquisition across principal photography: Macbeth color chart registration, 360° HDRI lighting brackets, and Arri/RED raw camera metadata logging. Managed 140+ VFX shots through Syntheyes 3D matchmoving, wire removal, and final supervisor review.

- 140+ Shots
- Syntheyes 3D
- Macbeth HDRI
- Arri/RED Conform

3D PREVIS & CINEMATICS • TECHNICAL ARTIST

Crucible & Aarav: 3D Previs Sequences

Authored complete technical pitch decks for 3D previsualization sequences, trailer-to-game visual pacing, virtual camera staging, and dynamic lighting passes.

- Technical Pitch Deck
- Trailer-to-Game
- 3D Previs Sequences
- Camera Staging

PRODUCT ARCHITECTURE • DESIGN SYSTEMS

Dominator Systems: Digital Product UI

Architected scalable digital interfaces with strict typographic balance, 8px layout grids, and WCAG AAA accessibility. Built high-conversion storefronts and programmatic motion graphics rendering at 60fps.

- Design Tokens
- Adobe Photoshop
- After Effects
- 60fps Motion

Academic Qualifications & Foundation

Formal university degree education and professional studio production training

ACCREDITED QUALIFICATIONS

4-YEAR UNIVERSITY DEGREE

Hyderabad, India

Bachelor of Fine Arts (BFA) in Animation and VFX

JNAFAU (Jawaharlal Nehru Architecture & Fine Arts University)

Four years of comprehensive full-time studio rigor covering classical human anatomy, 3D CGI modeling, spatial cinematography, lighting physics, and narrative previsualization.

- Animation and VFX
- Anatomy & Figure Drawing
- 3D CGI Modeling
- Cinematography Theory
- 3D Previs Sequences

3-YEAR PROFESSIONAL COURSE

Hyderabad, India

Animation VFX Prime

Arena Animation

Three-year comprehensive studio coursework in end-to-end 3D production pipelines, dynamic character rigging, cinematic lighting integration, and digital multi-pass VFX compositing.

- Animation and VFX
- 3D Pipeline Production
- Lighting & Shading
- Digital Compositing
- VFX LookDev
