BENNY JOEL LAKAMANA

GAME DEVELOPER & 3D GENERALIST

Begumpet, Hyderabad, India | +919014133656 | bennyofficial19@gmail.com | Portfolio & Demos Upon Request

Game Developer and 3D Generalist with expertise in Unreal Engine 5, Autodesk Maya, and camera tracking pipelines (SynthEyes, Mocha Pro). Experienced in supervising 3D artist teams, managing strict project deadlines, and leveraging **Git version control and AI-driven DCC automation** to streamline asset throughput. Specializes in real-time environment assembly, **game cinematic** and **game trailer** previsualization, and DCC-to-engine handoffs. Experienced in **working with MetaHumans** and performing rigorous **game testing**—dedicated to bridging visual storytelling with real-time interactive game engine execution.

TECHNICAL SKILLS

GAME ENGINES & REAL-TIME

Unreal Engine 5.8 | Nanite | Lumen | MetaHumans | Markerless Mocap | Neural Rendering | Sequencer | Lighting | Virtual Camera | Game Testing

3D MODELING & ANIMATION

Autodesk Maya

Environment & Props | Grooming | Topology | UV Unwrapping | Animation

TRACKING & MATCHMOVING

SynthEyes • Boris FX Mocha Pro

3D Camera Solves | Planar Tracking | Lens Distortion

COMPOSITING & ART

The Foundry Nuke • Adobe Suite

Photoshop | After Effects | Storyboarding

PIPELINE, GIT & DCC

Git & GitHub • DCC Pipelines

Git Versioning | Maya-to-UE5 | AI Automation

EDUCATION

BFA in Animation

Jawaharlal Nehru Architecture and Fine Arts University, is an architecture and fine arts university

Hyderabad, India — 2022 – 2026

★ Ranked in Top 10% of Class

Cinematica Expo & Unreal Engine Workshops

Diploma in Animation & VFX Prime

Arena Animation

Hyderabad, India — 2021 – 2025

3D production pipelines, visual effects, and digital asset copyright

CORE COMPETENCIES

- Real-Time Environment Assembly & Staging
- DCC-to-Engine Pipelines & Git Workflows
- Unreal Engine Previs & Camera Choreography
- 3D Artist Team Supervision & Quality Control
- AI-Driven Pipeline Automation & Task Tracking

LANGUAGES

English	Professional Working
Telugu	Native Proficiency
Hindi	Conversational

PROFESSIONAL EXPERIENCE

Assistant VFX Supervisor — 2026 – Present

Technical Artist VFX — Hyderabad, India

- **Artist Supervision & Quality Assurance:** Supervised a multidisciplinary team of 3D artists, enforcing rigorous quality standards and consistently meeting project delivery deadlines.
- **Pipeline & Task Management:** Managed and tracked day-to-day shot progress using studio project management software, ensuring transparent updates and streamlined asset throughput.
- **Departmental Alignment:** Coordinated directly with leads across modeling, lighting, and compositing to resolve bottlenecks, maintain asset continuity, and ensure visual alignment.

Production Coordinator & Assistant VFX Supervisor — 2026

MSR Creations • Feature Film: *TAKSHAKA* — Hyderabad, India

- **On-Set Technical Coordination:** Directed on-set data capture, green-screen stunt coordination, and camera tracking alignment for high-fidelity CGI environment and live-action plate integration.
- **Maya CG Environment & Asset Integration:** Supervised 3D environment asset integration in Maya, matching photorealistic lighting, shaders, and geometry to live-action camera plates.
- **Technical Alignment:** Liaised with matchmove and compositing artists to debug camera solve issues and layout discrepancies, ensuring on-time final delivery.

FEATURED PROJECTS & TECHNICAL WORK

Unreal Engine 5 Real-Time Environment & Previsualization — REAL-TIME SHOWCASE

Unreal Engine 5.8 • Nanite • Lumen • Sequencer • Real-Time Staging

- Assembled interactive environments and performed **game testing** to ensure real-time fidelity using **Nanite** virtualized geometry, **Lumen** dynamic global illumination, and **neural rendering**.
- Engineered custom virtual camera tracks in **Sequencer** for immersive **game cinematics** and high-impact **game trailers**.
- Elevated character visual fidelity for the **MetaHuman pipeline** by integrating custom **hair grooming** from Maya and retargeting **markerless mocap** animations natively inside Unreal Engine.

Feature Film CG Integration & Camera Tracking Pipeline — PRODUCTION SHOWCASE

Autodesk Maya • SynthEyes • Mocha Pro • The Foundry Nuke

- Executed 3D camera tracking solves and matchmoving in **SynthEyes** and **Mocha Pro**, locking digital assets with accurate lens distortion to live-action plates.
- Integrated Maya 3D environment geometry with matched focal lengths and coordinate systems, ensuring seamless composite handoffs.
