BENNY JOEL LAKAMANA

VISUAL DESIGNER • 3D TECHNICAL ARTIST • MOTION SYSTEMS

Begumpet, Hyderabad, India | +91 9014133656 | bennyofficial19@gmail.com | bennyjoel.github.io/portfolio

Fine Arts Graduate (BFA in Animation, JNAFAU) with comprehensive production leadership across **feature film on-set VFX coordination (140+ shots)**, **3D previs sequences**, **Unreal Engine trailer-to-game environments**, and **code-driven motion systems**. Specialized in sub-pixel camera tracking (SynthEyes, Mocha Pro), 3D asset modeling in Autodesk Maya, digital product UI, and node-based diffusion workflows. Proven track record managing multidisciplinary artist teams under strict theatrical delivery milestones, enforcing visual brand continuity and zero-defect execution.

TECHNICAL TOOLKIT

3D & GAME ENGINES

Unreal Engine 5 | Autodesk Maya | Trailer-to-Game | Nanite | Lumen | Sequencer | Virtual Camera | Topology & UVs

TRACKING & COMPOSITING

SynthEyes (3D) | Mocha Pro | The Foundry Nuke | Sub-Pixel Solves | Lens Distortion | Clean Plate Prep

MOTION DESIGN & DIGITAL UI

Adobe After Effects | Adobe Photoshop | 60fps Motion | Design Tokens | 8px Layout Grid | WCAG AAA

AI & WORKFLOW AUTOMATION

ComfyUI (Nodes) | Google Antigravity | Claude | Prompt Engineering | Git Version Control

PRODUCTION EXPERIENCE

Assistant VFX Supervisor & Visual Designer
2026 – Present

Technical Artist VFX — Hyderabad, India

- **Artist Supervision & Quality Assurance:** Supervised a multidisciplinary team of 3D and visual artists, conducting daily review sessions, enforcing strict visual quality benchmarks, and ensuring zero-defect deliverables.
- **3D Previs & Storyboard Translation:** Translated narrative briefs and conceptual storyboards into polished 3D previsualization sequences, camera blocking, and background plate handoffs.
- **Pipeline & Milestone Execution:** Managed day-to-day shot throughput using studio tracking software, eliminating cross-departmental bottlenecks and maintaining 100% on-time milestone delivery.

VFX Production Coordinator & Visual Media Lead
2026

MSR Creations • Feature Film: *TAKSHAKA* — Hyderabad, India

- **On-Set Technical Coordination:** Directed on-set data acquisition across principal photography: Macbeth color chart registration, 360° HDRI lighting brackets, and Arri/RED raw camera metadata logging across 140+ feature film VFX shots.
- **3D Camera Tracking & Plate Prep:** Supervised SynthEyes sub-pixel 3D camera recovery, lens distortion profiling, and high-fidelity plate cleanup for live-action integration.
- **Maya CG Environment Integration:** Coordinated 3D set extensions in Autodesk Maya and Unreal Engine, matching photorealistic lighting, shaders, and geometry to theatrical camera rushes.

ACADEMIC CREDENTIALS

Bachelor of Fine Arts (BFA)
JNAFAU (Jawaharlal Nehru Architecture & Fine Arts University)
Hyderabad, India — 4-Year Degree • 2026

★ Ranked in Top 10% of Class

Anatomy, 3D CGI Modeling, Cinematography, Previs

Advanced Diploma in 3D Animation & VFX
Arena Animation
Hyderabad, India — Studio Diploma
3D pipeline, lighting, shading & digital compositing

CORE COMPETENCIES

- 3D Previs Sequences & Camera Staging
- On-Set VFX Data Acquisition (Macbeth/HDRI)
- Trailer-to-Game Real-Time Level Design
- Sub-Pixel 3D Matchmoving & Wire Removal
- Design Token Architecture & Kinetic UI
- Multidisciplinary Artist Team Supervision

LANGUAGES

English	Professional Working
Telugu	Native Proficiency
Hindi	Conversational

KEY TECHNICAL PROJECTS

Crucible & Aarav: 3D Previs Sequences & Pitch Decks
PREVIS SHOWCASE

3D Previs Sequences • Visual Storyboards • Camera Choreography • Character Silhouettes

- Authored complete technical defense pitch decks detailing 3D previsualization sequences, dramatic key lighting setups, and camera staging.
- Engineered high-stress facial silhouettes and anatomical character studies for real-time digital production pipelines.

Unreal Engine 5: Trailer-to-Game Environments & Sets
REAL-TIME 3D

Unreal Engine 5 • Nanite Geometry • Lumen Dynamic GI • Virtual Camera • Sequencer

- Assembled real-time interactive levels (Worldbreaker, Subterranean Cathedral Vault, River Gorge) engineered for seamless camera traversal and gameplay testing.
- Designed atmospheric volumetrics, physical material displacement, and dynamic sun-angled lighting passes rendered at master fidelity.

Dominator Systems: Product UI & Kinetic Motion Systems
INTERFACE DESIGN

Adobe Photoshop • After Effects • Design Tokens • 8px Layout Grid • 60fps Motion

- Architected high-conversion digital product storefronts with strict typographic balance, 8px layout grids, and WCAG AAA compliance.
- Engineered programmatic 60fps motion graphics and broadcast video packages with audio-reactive waveforms and fluid transitions.
