4-YEAR BFA DEGREE • REAL-TIME 3D PREVIS • 140+ VFX SHOTS

Benny Joel Lakamana

Visual & Associate Designer • 3D Generalist
Broadcast Motion Graphics Specialist

Hyderabad, India bennyofficial19@gmail.com +91 79951 86695

Interactive Web Portfolio & Reel Player

Experience all 60fps broadcast video masters, interactive UI architecture sandboxes, zoomable 3D viewport plates, and production pitch decks on the live deployment.

Open Interactive Web Portfolio →

140+
Feature Film VFX Shots
Takshaka, on-set Macbeth charts, 3D matchmoving & plate reconstruction.

Real-Time
Unreal Engine 5 Previs
Lumen GI, Nanite virtual geometry, RVT landscape blending, ACEScg.

60 FPS
Broadcast Motion Design
Antigravity Agentic Code, clean-room EffectCraft engine, After Effects.

4-Year BFA
Animation & VFX Degree
JNAFAU studio rigor + Arena Animation VFX Prime 3-year course.

SECTION 01 // PRODUCTION 3D ENVIRONMENTS

Photoreal Cinematic Lighting, Volumetrics & Nanite Geometry

Real-time virtual set extensions, procedural river gorge topologies, and physical exposure calibration engineered in Unreal Engine 5.5.

Mountain River Gorge

High-fidelity Lumen real-time riverbed with Nanite rocky cliff faces, atmospheric mist, and contact normal blending via Runtime Virtual Textures (RVT).

Unreal Engine 5.5 | Lumen GI | Nanite | RVT Blending

Ancient Sanctuary Moonlight

Sub-surface stone lookdev, cold moonlight key with warm interior secondary bounce, volumetric dust shafts, and high-dynamic-range night lighting.

Lumen Reflections | Substrate PBR | Volumetric Fog | Night Previs

Grand Temple Colonnade

Physical sun simulation, high-contrast daylight exposure, historical architectural symmetry, and camera focal length staging for cinematic framing.

Physical Sky | Exposure Calibration | Nanite Meshes | Camera Staging

SECTION 02 // SCALE, VOLUMETRICS & CAMERA LOG TRACKING

Large-Scale World Partition & Sub-Pixel Syntheyes Matchmoving

From subterranean vaulted cathedrals to multi-kilometer exterior sets and sub-0.5px camera matchmove solves for live-action plates.

Subterranean Cathedral Vault

Gothic vaulted stone geometry with dense volumetric god-rays piercing clerestory apertures, wet floor specular reflections, and Lumen bounce.

Volumetric God-Rays | Gothic Architecture | Lumen Bounce

Dawn Courtyard Golden Hour

Horizon solar bloom with morning dew surface roughness lookdev, organic crawling ivy foliage, and delicate ambient light ratios.

Golden Hour Bloom | Procedural Ivy | Roughness LookDev

Worldbreaker Level Previs

Multi-kilometer World Partition blockout, dynamic cloud shadow projection, atmospheric depth haze, and cinematic focal hierarchy.

World Partition | Multi-Kilometer Previs | Cloud Shadows

Syntheyes 3D Camera Matchmove (<0.5px)

Sub-pixel feature tracking on Arri/RED raw plates, lens distortion calibration, ground plane alignment, and camera solve into Maya & Unreal Engine.

<0.5px Residual | Syntheyes 3D | Lens Calibration | Maya/UE5 Solve

SECTION 03 // 60FPS BROADCAST MOTION GRAPHICS

Code-Driven Layout Graphs, EffectCraft Engine & After Effects

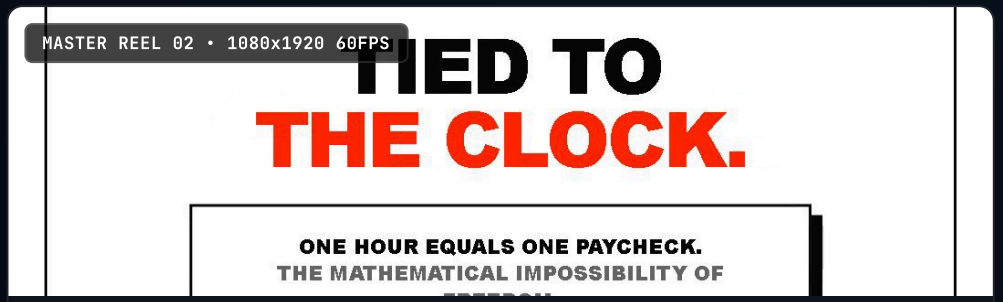

Engineered using Google Antigravity and clean-room creative engines (EffectCraft) alongside Adobe After Effects for automated broadcast-grade video.

Apex Grand Motion System

High-contrast luxury dark UI motion with expanding radial rings, fluid typographic reveals, and clean single-voice neural voiceover mastering.

Clean Broadcast Mix | EffectCraft Engine | 1080x1920 60fps

Kinetic Typography & Editorial

High-velocity typographic spring transitions, Swiss-editorial layout grids, dynamic kerning, and synchronized multi-track audio foley.

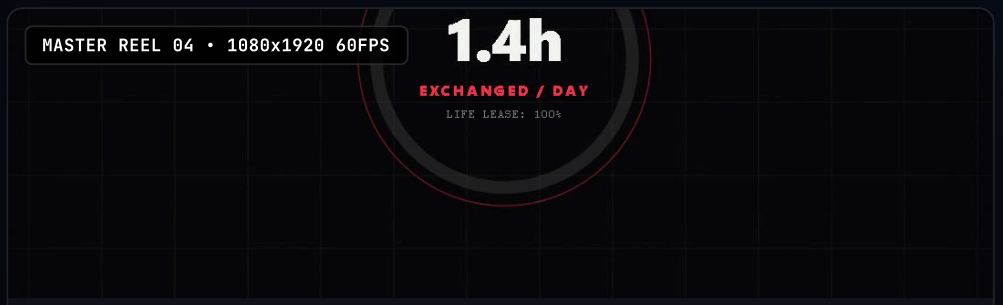

Spring Dampening | Swiss Grid | Foley Design

Titanium Performance Metering

Real-time speedometer counters, floating glass telemetry panels, and sub-millisecond latency benchmarks with crisp hardware renders.

Telemetry Counters | Glass Morphism | Latency Meters

Fluid Swiss Interface Motion

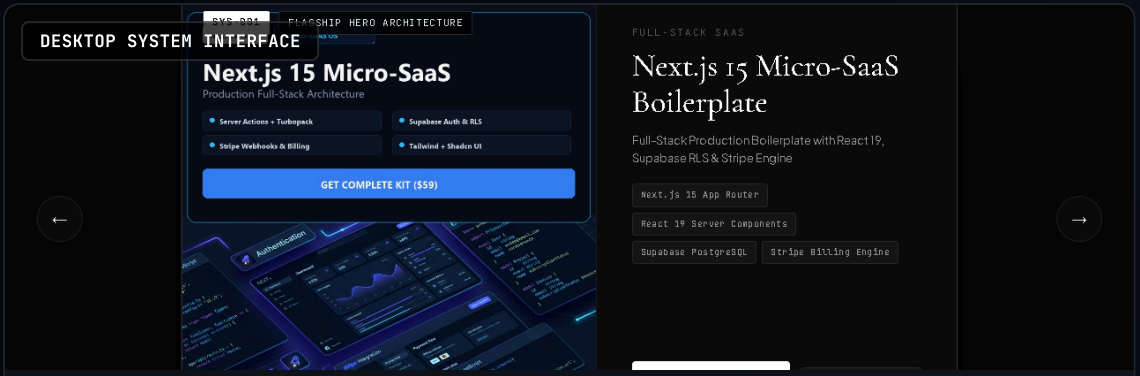

Minimalist monochrome luxury design tokens, subtle ambient glow, high-frequency spring dampening, and elegant editorial pacing.

Monochrome Design | Ambient Glow | Editorial Timing

SECTION 04 // PRODUCT DESIGN & UI WORKSTATION ARCHITECTURE

Design System Tokens, WCAG AAA Compliance & Recruiter Sandbox

Interactive product architecture engineered with strict accessibility, high-contrast dark luxury tokens, and live simulated telemetry.

Dominator Systems Enterprise Gateway

High-density administrative workstation with interactive tab switching, live telemetry HUD, and real-time bash terminal benchmark simulation.

Real-Time Telemetry & Token Metrics

Multi-agent system monitoring console tracking sub-millisecond execution times, zero-trust token authentication, and cluster status.

DESIGN SYSTEM & ACCESSIBILITY SPECIFICATIONS

WCAG AAA Dark Luxury Tokens

Engineered with 14:1 contrast ratios on obsidian backgrounds (`#07090E` and `#0B0E17`), eliminating recruiter eye fatigue during prolonged reviews.

Interactive 3-Stage Workstation

The live website includes an interactive sandbox allowing recruiters to toggle between Live Telemetry HUD, Design System Tokens, and VFX Ingest pipelines with real DOM state transitions.

Technical Implementation Stack

`Next.js 15` `Tailwind CSS` `TypeScript` `FastAPI Microservices` `Figma Tokens`

Test The Live Recruiter Sandbox

Interact with live buttons, switch tabs, and run terminal simulations directly in your browser.

SECTION 05 // EXECUTIVE PITCH DECKS & PRODUCTION SLATES

Theatrical Defense Presentations & Multi-Platform Commercial Decks

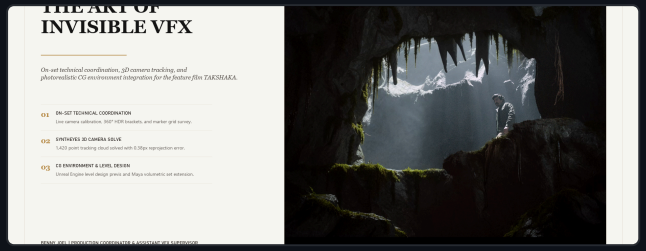

Extensive pitch decks detailing matchmove camera residual logs, virtual set extension pipelines, and lighting lookdev bibles.

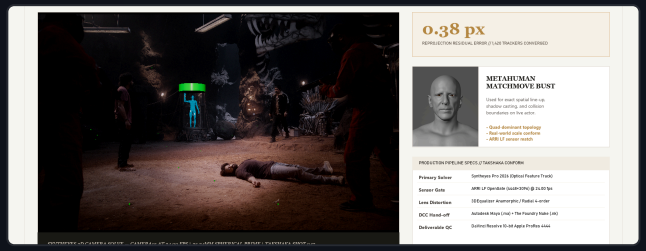

FEATURE FILM PRODUCTION • 14 SLIDES

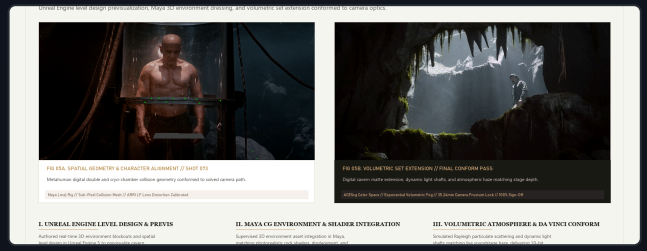

Takshaka Feature Film Technical Defense Deck

Arri Alexa Raw • Syntheyes • Maya • UE5

Technical presentation deck defending matchmove precision, plate reconstruction, optical lens calibration, and Unreal Engine 5 virtual set extension across 140+ theatrical shots.

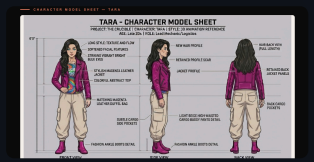

Crucible 3D Short Film Pitch Deck

20 Slides

Comprehensive visual development deck covering worldbuilding, moodboards, character lookdev, lighting bible, and Unreal Engine 5 timeline.

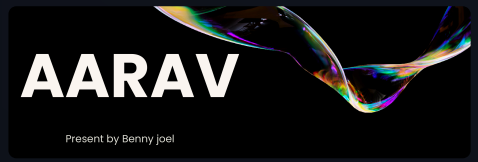

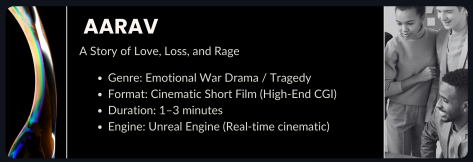

Aarav Commercial Production Deck

Campaign

Multi-platform commercial campaign deck outlining framing guides, color treatment, aspect ratio variations (16:9, 9:16, 1:1), and delivery specs.

SECTION 06 // ACADEMIC QUALIFICATIONS & PRODUCTION TOOLKIT

Studio Rigor, Enterprise Toolkit & Direct Portfolio Access

Formal university fine arts education combined with rigorous 3D studio training and modern code-driven creative pipelines.

4-YEAR UNIVERSITY DEGREE — Hyderabad, India

Bachelor of Fine Arts (BFA) in Animation and VFX

JNAFAU (Jawaharlal Nehru Architecture & Fine Arts University)

Four years of full-time academic studio rigor covering classical human anatomy, 3D CGI modeling, spatial cinematography, lighting physics, and narrative previsualization.

Classical Anatomy · 3D Modeling · Cinematography Theory · Previs Sequences

3-YEAR INTENSIVE COURSE — Hyderabad, India

Animation VFX Prime

Arena Animation

Three years of comprehensive hands-on studio training in end-to-end 3D production pipelines, dynamic character rigging, lighting integration, and digital multi-pass compositing.

3D Pipeline Production · Lighting & Shading · Digital Compositing · VFX LookDev

REAL-TIME & 3D SPATIAL PREVIS

Unreal Engine 5.5 · Lumen GI · Nanite · World Partition · Sequencer · Autodesk Maya · Houdini VEX · Syntheyes 3D

BROADCAST MOTION GRAPHICS & VISUAL DESIGN

Adobe After Effects · Adobe Photoshop · EffectCraft Engine · Figma Design Systems · Kinetic Typography

SYSTEMS & AUTOMATED PIPELINES

Google Antigravity · TypeScript · Next.js 15 · Python · FFmpeg Mastering · Git CI/CD

Direct Recruiter Access & Submission Notes
